

## **2016 Committee Considerations in regard to Care of the Future of Minneapolis Friends Meeting**

**Please make one or more occasions for your committee to look at the  
vision statements.**

You might have each committee member individually read them and underline the phrases that most relate to his/her committee work, and then have the group discussion of how these statements relate to the committee's work.

Use the following questions as a guide to your group's discussion:

**How do the vision statements relate to your committee's  
responsibilities?**

\*What are the two or three things your committee is already doing that supports these vision statements?

\*What are the things you would be willing to take on?

\*Are there things your committee notices are missing in our Meeting that you would be willing to take on?

\*What are the challenges or barriers for your committee in pursuing these actions?
